Goods and Services

Businesses want to make money. There are two ways to do this. They can produce goods or provide services.

Goods are products. They are things that people buy and sell. Food, clothes, cars, books, and houses are goods. There are virtual goods, too. For example, you can read an e-book on a tablet. When a farmer grows food or a carpenter makes a table, they are producing goods.

Services are activities that people do for others. When a hairdresser cuts your hair or a nurse looks after you, they are providing a service. Actors and singers provide a service, too. They entertain you.

Some businesses provide goods and services together. For example, a restaurant sells goods: the food and drink. But it provides services, too: the waiters take the food to the table and other people wash the dishes after the meal and mop the floor before the restaurant closes.

Goods and Services

Businesses want to make money. There are two ways to do this. They can produce goods or they can provide services.

- 1 Goods** are products. They're things that people buy and sell. Food, clothes, cars, books and houses are goods. There are virtual goods, too, for example electronic books that you can read on a tablet. When a farmer grows food or a carpenter makes a table, they're producing goods.
- 2 Services** are activities that people do for others. When a hairdresser cuts your hair or a nurse looks after you, they're providing a service. Actors and singers provide a service, too: they entertain you.
- 3** Some businesses provide goods and services together. For example, a restaurant sells goods: the food and drink. But it provides services, too: the waiters take the food to the table and other people wash the dishes after the meal.
