## Reduce, Reuse, Recycle to Help the Environment

Reduce, reuse, and recycle are very important because they can lower the waste. New lifestyles, such as buying fast food and handshake drinks can create extra waste. COVID-19 has also changed our shopping habit from in-store to online, causing a lot of extra plastic packages and boxes. Reduce, reuse, and recycle can lower the need for raw materials and do good for our earth.

There are lots of things we can do to help the environment. For example, bring reusable shopping bags, containers, and chopsticks when we go out, recycle the bottles after we finish a drink, and reuse one-side used papers. Everyone can start small and help the world!

Reduce, reuse, and recycle can make the world better, and they can be easy when you make it a habit. Next time, when you are in a convenience store, the clerk asks, "Do you need a plastic bag?" Think about the environment! The earth can be a better place with your help- start to reduce, reuse, and recycle today!
