

試題本文

They like to be in the water. They can hold their breath for 3-4 minutes.
They can also close their ears to keep water out.
They are both amazing speedy swimmers.

Otters

- ☆ They eat 15 to 25 percent of their body weight every day. Otters are smaller in size.
- ☆ Otters jump into the rivers for fun or to catch fish for food. They run and sleep on land.
- ☆ Under their arms, there is nothing except hair.
- ☆ They don't float; they swim in the water.

Sea Otters

- ☆ They eat 20 to 30 percent of their body weight every day. Sea otters are bigger in size.
- ☆ Sea otters spend all the time living on the water.
- ☆ There are pockets under their arms. They put food or tools there. Tools can help them eat food.
- ☆ They float on the water.
- ☆ They put the hands on their faces to keep their hands warm because their paws do not have hair.

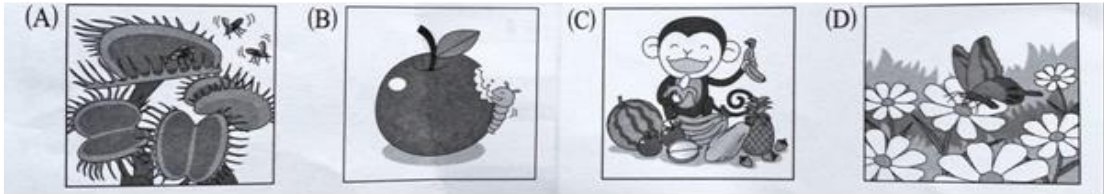

They are carnivorous: they mainly eat fish, frogs, and so on. Leaves or grass is never their food. All the otters eat a lot.
